Biodiversity from the roots up...

Planting native wildflowers is the best (& easiest) way to increase the wildlife in your garden, community project, farm or designed landscape.

Wildflowers, as well as being attractive and useful additions to your garden, are a vital source of food for bees, butterflies, birds and other beasties.

Grow a meadow and you will have a beautiful, low maintenance but high benefit habitat that will give you years of pleasure.

Wildflower Seed Packets

GOOD FOR:

bees

shadier areas

birds

light shade

butterflies

sunny open sites

wet areas

night-scented

birds

dry/free draining sites

Single species

Bluebell/Wild Hyacinth £2.50

Hyacinthoides non-scripta

Familiar woodland plant which forms a carpet of highly-scented, intense blue in spring. Our Bluebell seeds are sold under licence from the Scottish Government. 40cm. 50-100 seeds per packet. Flowers April-June. Perennial.

Clustered Bellflower £2.50

Campanula glomerata

Attractive spikes of deep purple bell-like flowers. For open well-drained sites. 60cm. 1000+ seeds per packet. Flowers June-August. Perennial.

Common Mallow £2.50

Malva sylvestris

Tall plant of open places with large pink/mauve flowers. 90cm. 150-200 seeds per packet. Flowers July-September. Perennial.

Cornflower £2.50

Centaurea cyanus

Intense blue, vigorous flower of sunny fertile sites, once common in arable fields, but now rare. 60cm. 50-150 seeds per packet. Flowers July-September. Annual.

Corn Marigold £2.50

Glebionis segetum

Large, daisy-like, golden-yellow flowers. For open sunny sites. 60cm. 150-250 seeds per packet. Flowers July-September. Annual.

Cowslip £2.50

Primula veris

Bright yellow spring meadow flower, now scarce in the wild. For open, sunny sites. 30cm. 200-400 seeds per packet. Flowers April/May. Perennial.

Cuckooflower £2.50

Cardamine pratensis

Spring wildflower of damp places with white/pale pink flower heads. Good nectar plant for butterflies. 30cm. 150-250 seeds per packet. Flowers April-May. Perennial.

Devil's-bit Scabious NEW FOR 2012! £2.50

Succisa pratensis

Early autumn wildflower with purple, 'pom-pom' shaped flower heads. Very good nectar plant for bees and butterflies. 50cm. 70-100 seeds per packet. Flowers August-October. Perennial.

Field Scabious £2.50

Knautia arvensis

Late summer wildflower with flat lilac flower heads. Very good nectar plant for butterflies. 100cm. 50-100 seeds per packet. Flowers July-September. Perennial.

Foxglove £2.50

Digitalis purpurea

Tall plant of woodland edges & rocky places, with pink, sometimes white, bell shaped flowers with copper 'freckles'. Loved by bumblebees. 150cm. 1000+ seeds per packet. Flowers June-August. Biennial.

Giant Bellflower **£2.50**

Campanula latifolia

Tall, elegant shade-tolerant plant with white/pale lilac flowers. 150cm. 500-1000 seeds per packet. Flowers July-September. Perennial.

Goatsbeard **£2.50**

Tragopogon pratensis

Goatsbeard closes its dandelion-like flowers around midday & so is also known as Jack-go-to-bed-at-noon. It has seed-heads like large, delicate, dandelion 'clocks'. 70cm. 20-30 seeds per packet. Biennial.

Greater Knapweed **£2.50**

Centaurea scabiosa

Tall meadow flower of open places with feathery, red-purple flowers, attractive to butterflies. 90cm. 50-100 seeds per packet. Flowers June-September. Perennial.

Heather **£2.50**

Calluna vulgaris

Woody shrub typical of Scottish moorland. Purple/pink flowers in late summer. Popular with bees. Up to 60cm. 1000+ seeds per packet. Flowers July-September. Perennial

Kidney Vetch **£2.50**

Anthyllis vulneraria

Low growing wildflower of coastal areas with fuzzy, yellow flower heads. For sunny, well-drained sites. Up to 20cm tall. 100-200 seeds per packet. Flower May-August. Perennial

Maiden Pink **£2.50**

Dianthus deltoides

Charming, tuft-forming plant with deep pink flowers. Happy in sunny, well-drained sites. 30cm. 300- 500 seeds per packet. Flowers June-August . Perennial.

Meadowsweet £2.50

Filipendula ulmaria

Tall, sweet-scented plant with fluffy, creamy-white flowers. Happy at pond edge or damp site. 100cm. 200-500 seeds per packet. Flowers July-September. Perennial.

Meadow Cranesbill £2.50

Geranium pratense

Tall, bushy meadow perennial, especially of damp soils. Large, amethyst flowers. 100cm. 50-150 seeds per packet. Flowers July-September. Perennial.

Melancholy Thistle £2.50

Cirsium heterophyllum

This slender elegant thistle is a native perennial of damp hedgerow places. 100cm. 100-200 seeds per packet. Perennial.

Mullein £2.50

Verbascum thapsus

Tall yellow-flowered biennial of sunny banks & woodland clearings. Hairy felt-like leaves. Up to 180cm. 1000+ seeds per packet. Biennial.

Nottingham Catchfly £2.50

Silene nutans

Delicate, rare species for well-drained soil & sunny sites. Pale, night-scented flowers attract insects & as a result, bats. Flowers May/June. 80cm. 200-500 seeds per packet. Perennial.

Ox-eye Daisy £2.50

Leucanthemum vulgare

Vigorous wildflower with large cheerful white flower heads with yellow centres. 100cm. 400-500 seeds per packet. Flowers June-September. Perennial.

Poppy **£2.50**

Papaver rhoeas

One of the most popular wildflowers, a cornfield annual with fantastic scarlet flowers. For open, sunny places. 60cm. 1000+ seeds per packet. Flowers July/August. Annual.

Primrose **£2.50**

Primula vulgaris

One of the first spring flowers, found in woods & on grassy banks. Pale yellow flowers. 15cm. 50-150 seeds per packet. Flowers February-May. Perennial.

Ragged Robin **£2.50**

Silene flos-cuculi

Ragged petaled, pink flowers which wave in the wind. Found in damp meadows & woods. 70cm. 1000+ seeds per packet. Flowers July/August. Perennial.

Red Campion **£2.50**

Silene dioica

Vigorous red/pink flower of woods & hedgerows. 90cm. 300-500 seeds per packet. Flowers May-August. Perennial.

Rock Rose **£2.50**

Helianthemum nummularium

Low, spreading, yellow-flowered wildflower of sunny banks & cliffs. Great rockery plant loved by honeybees. 20cm. 500-1000 seeds per packet. Perennial.

St. John's Wort **£2.50**

Hypericum perforatum

A robust, bushy plant, happy on a wide range of sites. Glossy golden flowers. 90cm. 1000+ seeds per packet. Flowers July-September. Perennial.

Scottish Bluebell (Harebell) £2.50

Campanula rotundifolia

Delicate, blue flower of open grassland. Likes well-drained, sunny sites. 40cm. 1000+ seeds per packet. Flowers July-September. Perennial.

Scottish Primrose £4.30

Primula scotica

A rare, delicate wildflower found in the wild only in northern Scotland. It has tiny, yellow-centred, burgundy flowers, twice a year. 10cm. 50-150 seeds per packet. Flowers April-June and July/August. Perennial.

Selfheal £2.50

Prunella vulgaris

Vigorous, low-spreading plant with violet flowers. Suited to a range of sites from open sun to shade. 30cm. 400-600 seeds per packet. Flowers July/August. Perennial.

Sneezewort £2.50

Achillea ptarmica

Clusters of small, white, daisy-like flowers are produced on this short perennial that is happy in damp, sunny places. 30cm. 500-800 seeds per packet. Flowers July-September. Perennial.

Tansy £2.50

Tanacetum vulgare

Tall, aromatic, yellow-flowered species with dark, feathery foliage. Enjoys sunny & lightly-shaded sites. 150cm. 300-500 seeds per packet. Flowers August/September. Perennial.

Teasel £2.50

Dipsacus fullonum

Tall biennial with large seed heads which look beautiful over winter. Prefers open sites. 200cm. 50-100 seeds per packet. Flowers July-September. Biennial.

Thrift £2.50

Armeria maritima

Plant of open rocky places, usually by the sea. It has narrow leaves that form dense tufts with abundant candy pink flowers on stalks up to 25cm tall. 100-200 seeds per packet. Flowers April-August. Perennial.

Toadflax £2.50

Linaria vulgaris

Small spikes of yellow and orange flowers. Found in grasslands and roadsides. 60cm. 100-200 seeds per packet. Flowers July-September. Perennial.

Violet £2.50

Viola riviniana

Little, spring-flowering plant with purple flowers and glossy green, heart-shaped leaves, found on banks beside burns, in woodland clearings & hedgerows. 10cm. 100-200 seeds per packet. Flowers April-August. Perennial.

Viper's Bugloss £2.50

Echium vulgare

Produces spectacular spikes of blue flowers that are very attractive to bees, butterflies & moths. 100cm. 50-150 seeds per packet. Flowers May-August. Biennial.

Water Avens £2.50

Geum rivale

A delicate waterside species flowering early in the year with down-turned peachy petals on scarlet stems. 50cm. Flowers April-June 100-200 seeds per packet. Perennial.

White Campion £2.50

Silene latifolia

A wildflower of open, free-draining sunny sites, producing white flowers on long red or green stems. 100cm. 400-600 seeds per packet. Flowers May-August. Perennial.

Wild Marjoram £2.50

Origanum vulgare

A scented herb, similar to cultivated marjoram or oregano. Pink flowers that attract bees. 60cm. 1000+ seeds per packet. Flowers July-September. Perennial.

Wild Thyme £2.50

Thymus polytrichus

Aromatic, low-growing, mat forming shrub with small pink flowers of dry, open sites. Can be grown in walls or paving. 5cm tall. 200-400 seeds per packet. Flowers July-September. Perennial.

Wild Strawberry £2.50

Fragaria vesca

Low growing, spreading plant that produces intensely flavoured scarlet fruit after small white flowers. Happy in light shade - can be grown in paving. 15cm tall. 200-400 seeds per packet. Flowers May-August. Perennial.

Yarrow £2.50

Achillea millefolium

Vigorous meadow flower with heads of white and sometimes rosy-pink flowers. 70cm. 500-1000 seeds per packet. Flowers July-September. Perennial.

Yellow Flag £2.50

Iris pseudacorus

Striking and elegant wild yellow Iris. Likes ponds & ditches but can grow in any deep soil that does not dry out. Up to 120cm. 20-30 seeds per packet. Flowers July-September. Perennial.

Scots Pine

£2.75

Pinus sylvestris

Seeds collected from ancient Caledonian forest
This lovely, slow-growing tree usually lives
150 to 300 years, although there are Nordic
individuals over 600 years old. Up to 25 m tall.
50-100 seeds per packet. Keep an eye out for
our special Christmas Tree Scots Pine
packets...

Mini-mixes: Seed packets with a mix of
species that will cover approximately 1-2m²

Butterfly Mini-mix

£4.30

Clustered Bellflower, Common Knapweed,
Field Scabious & Wild Marjoram. A mixture of
wildflowers that provide a good source of
nectar for butterflies. 1000+ seeds per packet.
Perennial.

Bumblebee Mini-mix

£4.30

Bush Vetch, Devil's-bit Scabious, Red Clover,
Toadflax and Vipers Bugloss. A mix of species
that are loved by bumblebees. 1000+ seeds per
packet. Perennial and biennial.

Cornfield Mini-mix

£4.30

A colourful mix of Cornflower, Corn Marigold,
Corn Poppy and Mayweed. A one year mix,
that provides a quick & colourful display &
nectar for insects. 1000+ seeds per packet.
Annual.

Pond Edge Mini-mix

£4.30

Meadowsweet, Ragged Robin, Water Avens &
Yellow Flag. These species will add interest to
the shallows & edges of a pond & provide food
& shelter for insects. 1000+ seeds per packet.
Perennial.

Seaside Mini-mix**£4.30**

Thyme, Rock Rose, Maiden Pink & Thrift. These colourful low growing plants are salt & wind tolerant. They can be found in sunny, exposed places that can be quite dry so are ideal for a sunny window box or for a seaside or free-draining exposed area. 500-1000 seeds per packet. Perennial.

**Winter Wildflowers Mini-mix****£4.30**

Burdock, Cow Parsley, Common Knapweed, Teasel & Wild Carrot. The beautiful stems & seed heads of these wildflowers look stunning when covered in frost & will provide food & shelter for birds & insects during the winter. 500-1000 seeds per packet. Perennial and biennial.

Woodland Mini-mix**£4.30**

Bluebell, Giant Bellflower, Primrose, Red Campion & Slender St. John's Wort. This collection of woodland plants adds colour & interest to your wood or shady patch. 500-1000 seeds per packet. Perennial.

WILDFLOWER SEED MIXTURES

Our wildflower mixes contain native wildflowers in the best proportions to create a balanced community of different plants. Most soils in Scotland which can be cultivated are near neutral or slightly acid and our mixtures reflect this.

As well as our standard mixes, for any volume over 1kg we can make up a mix to your specific requirements and all of the wildflowers found as part of our meadow mixes can be provided without the grasses, either to grow as blocks of mixed wildflowers or to add to existing grassland (and manage as a meadow).

Before sowing

Perennial wildflower mixes and meadows do well on sites with low fertility. Fertile sites, such as former arable fields, give fast growing, dominant plants, in particular grasses, too much of an opportunity to thrive and out-compete slower wildflowers.

Aggressive arable weeds such as docks and nettles also like high fertility and may invade your meadow. Do not add fertilizer to your site.

A fertile site can be improved after sowing by cutting and removing the cuttings over 1 or 2 years.

The exceptions are cornfield annuals species (such as Cornflower and Poppy), which prefer fertile sites as they evolved alongside arable crops such as wheat.

Site preparation

Existing vegetation should be killed off and soil should be rotovated or harrowed and where possible, left for 3 to 4 weeks to allow weed seeds to germinate. Any weed seedlings should then be destroyed.

Sowing rates

Meadow mixes (grasses & wildflowers):

3g/m²* (12kg/acre, 30kg /hectare)

i.e. 100g will cover approximately 30 m². 1kg will cover approximately 300 m² .

*A lower sowing rate of 2g/m² can be used on a site of over 500m² with a good, weed-free seedbed.

Wildflower-only mixes (without grass):

2g/m² (8kg/acre, 20kg /hectare)

i.e. 100g will cover approximately 50 m². 1kg will cover approximately 500 m² .

Sowing

Sow in either spring (March to mid-June) or autumn (August to late September).

Mix the seed well!

Broadcast seed by hand or use a seeder suitable for grass seed. If sowing by hand, sawdust or sand may be mixed in to make the seed easier to handle.

Divide up the area into sections, and divide the seed into equal portions to sow each section, this helps to achieve even sowing and ensures that you do not run out of seed.

After sowing, the site should be rolled or trodden to improve seed contact with the soil.

MEADOW MIXES

Meadow management

Plant a meadow, however small, and you will have a low management, beautiful habitat that will continue to change and develop subtly over the years. As well as the benefits of nectar and pollen provided by wildflowers, native grasses also provide food and shelter for a wide range of animal species, from field voles to caterpillars.

Year one

For spring-sown meadows, cut once (to about 10cm) as soon as the meadow has reached about 40cm. This kills unwanted weeds and allows the sown species light and space.

For autumn-sown meadows, cut in the first spring in April or May.

Ongoing management

Manage Mavisbank, Wet, Dry, Hedgerow, Woodland, and Northern Haymeadow by cutting or grazing yearly at the end of the season in late September. It is possible to leave these meadows over winter, to leave attractive grasses and seed heads that can provide winter structure and wildlife food and shelter but the meadow must then be cut in early spring before it starts growing.

Highland Grassland Mix can be left once established without cutting. It can however be lightly grazed in autumn. However if the grassland grows very vigorously manage as the meadows above.

The Flowering Lawn Mix is designed to be managed as a tall flowering lawn and so should be cut to about 10cm throughout the growing season, except in July and August when it should be left to get the full effect from the flowers

Green roofs are usually areas where exposure and free-draining conditions keep the plant growth down.

Meadow management tips

- Preparation is the key. Choose the right mix for the right site and prepare the site well, getting rid of unwanted weeds before sowing.
- Slow excessive grass growth by including/adding Yellow Rattle or by cutting several times in the first year.
- Always remove cuttings and never add fertilizer.
- Allow the species in a mixture to establish; the meadow will change over a number of years until the species are eventually in balance.

Yellow Rattle

Rhinanthus minor

This is an attractive and useful annual plant that is hemi-parasitic, weakening grasses and clovers by feeding on their roots, allowing other plants more space to grow. It is effective when added to an established meadow by sowing in a wide area or in patches, from which the plants will spread in future years.

It must be sown in the winter (Oct – Dec) after first cutting or grazing the area then raking or rotovating to weaken the grass and provide bare soil. Scatter the seed and roll or trample it to create good contact with the soil. Annual.

Sowing rate: 1g/m²

5g:£4 10g:£6.50 100g:£21.50 1kg:£143

Mavisbank Meadow Mix

Our most popular mixture, a general mix for well-drained, loamy soils in open sites, this provides a range of plants for a type of species-rich grassland widespread in Scotland.

Northern Haymeadow

This mix recreates herb-rich pastures of traditionally-managed grasslands of upland Britain (British Plant Community MG3).

Remnants of ancient meadows of this type survive in Deeside and northern England.

Highland Grassland Mix

This mix recreates a moorland grass community found on well-drained highland sites with acidic soils. On upland sites this does not need to be cut, although it can be lightly grazed in autumn. This mix is based on the calcifugous British Plant Communities U2 and U4.

Green Roof Mix

These are low-growing species, tolerant of dry conditions for a wide range of green roofs with 100mm+ of substrate. As it is made up of a wide range of native (and wild origin) flowering species and grasses this will ensure that your roof provides maximum benefit for wildlife as well as being manageable and attractive.

WILDFLOWER-ONLY MIXES

Managing wildflower-only mixes

The Cornfield Annual Mix provides a colourful display in the year it is planted if sown in spring, or the following year if sown in autumn. Once finished, the flowers are unlikely to reappear the next year and this mix must be re-sown if you would like to repeat its effect.

The Bee, Bird & Butterfly, Winter Seedhead and Pond-Edge mixes include perennial species and will continue indefinitely.

Although the Bee, Bird & Butterfly mix can be cut back after flowering, leaving the seed heads and dried plants provides a striking winter feature as well as food and shelter for wildlife. Leaving the Winter Seedheads will be even more spectacular. These mixes can be cut in spring before they begin to grow again. The Get Nectar-rich quick mix will flower in the first year and can then be managed as the Bee, Bird and Butterfly Mix although you have the option of re-sowing after 3 years to refresh the area.

Pond Edge Mix

For marshy conditions or water margins, these wildflowers provide interest and colour around the edges of ponds. Adding appropriate native plants around ponds will also encourage pond-dwellers like toads, frogs, newts and dragonflies.

wildflowers:		%
<i>Achillea ptarmica</i>	Sneezewort	12
<i>Alisma plantago-aquatica</i>	Water Plantain	2

Winter Seedheads, Summer Blooms Mix NEW FOR 2012!

A selection of medium to tall biennial and perennial wildflowers. These are elegant wildflowers that are a popular source of food for bees, butterflies and useful species such as hoverflies and soldier beetles during the summer. In winter they leave striking stems and seedheads that are a valuable seed source and home for a range of 'beasties'.

About us

Our wildflowers

We can trace the wildflower seeds we sell back to the native plant communities from which they came. The seeds we grow are harvested from crops grown on our farm in Angus and all are traceable to their original collection site.

We grow over 200 species of native Scottish wildflowers; if there is a particular species that you need for your project, or you would like to buy large volumes of a single species then please contact us.

We also select and combine wildflower seeds and native grasses to create mixes to reflect and restore natural meadow communities or mixes designed to provide habitats for specific wildlife.

In many of our meadow mixes the grass seed that we use is of native species but not of wild origin and on occasion in our mixes we may use British wild origin wildflower seeds grown elsewhere in Great Britain - the origin will always be clearly indicated on your mix contents when it arrives.

We are also signatories to the Flora Locale Code of Practice for Collectors, Growers and Suppliers of Native Flora that ensures responsible collection and sale of native British plants.

Quality

Our seed laboratory, audited by the Official Seed Testing Station for Scotland, specialises in testing the seeds of native plants. We developed our seed testing laboratory and expertise through research funded by SMART and SPUR awards from the Scottish Government. We carry out testing to international standards and continue to improve the quality of our seeds through scientific research on our production methods.

Green producers

When we came to our farm over a decade ago it was one field, cultivated to the very edges to grow conventional crops and there were few birds, bees or butterflies. Now our wildflower crops are a great source of food and shelter for animals and birds including honeybees, many species of bumblebees and butterflies, grey partridge, lapwing and brown hares. Over a quarter of our farm is now devoted to environmental improvements including planted meadows, hedges, woodland and newly created ponds that are home to populations of toads, frogs and newts.

We source our packaging materials as sustainably as possible. Our seed packets are made in the UK and printed in Scotland.

We continue to reduce our packaging and wherever possible we use recyclable materials and reuse packaging that we receive.

This catalogue is printed in Scotland using 100% recycled paper and vegetable oil inks.

How to Order

To order, please visit our website:
www.scotiaseeds.co.uk

or make a note of your order opposite
and send it to us with a cheque made
payable to 'Scotia Seeds Ltd' to:
